

# The Hydrogen Economy and Technologies

## Webinar

Wednesday, 21 June 2023

Dear Member, Dear Friend of SACC,

The Swiss-Asian Chamber of Commerce, in cooperation with Empa, The Swiss Federal Laboratories for Materials Science and Technology, is organising a webinar “The Hydrogen Economy and Technologies” from 10:30 to 12:15 (CET) on Wednesday 21st June 2023.

Join us to better understand the state of play in the rush for delivering hydrogen, in particular, renewable hydrogen into mainstream energy usage in industry and for the consumer market.

The programme will focus on Europe where ambitious policies and targets have been introduced, such as Clean Hydrogen Partnership and substantial plans have been developed to enable rapid transformation to net zero.

Challenges abound. They include further technological advancement, infrastructure and logistics, financing, safety and security, technology adoption and manpower.

We are privileged to have at our event expert speakers from different backgrounds and disciplines, from systems design engineering to financing, and entrepreneurs, who share a common quest for a greener future.

We encourage you to register early. There is no charge for attending. Credit for relevant continuing education programmes may be obtained.

### Program

- 10:30 - 10:32 **Welcome**  
**Patrick Kriesemer**, Vice President, Chairman Malaysia & Brunei Committee, SACC, Zurich
- 10:32 - 10:35 **Introduction and Moderation**  
**Tuck Seng Low**, Co-chairman, Singapore Committee, Special Adviser, SACC, Zurich
- 10:35 - 10:55 **Hydrogen: one of the main pillars of a decarbonized energy system**  
**Dr. Panayotis Dimopoulos Eggenschwiler**, Group leader Vehicle Energy Systems, Empa, Switzerland
- 10:55 - 11:15 **Powering transportation and key challenges**
